

- **PHYSICAL REHABILITATION**

Cancer treatment can leave the patient with decreased strength and physical activity. Our physical rehabilitation specialist ensures our patients recover and regain strength and are able to perform their day-to-day activities independently.

- **ONCO-NUTRITION**

Nutrition is an important part of cancer treatment, recovery and prevention. Our Onco-nutritionists focus on re-introducing the concept of balanced eating while enriching the systems with anti-oxidants, phytonutrients and vitamins for better palatability, recovery and realising a better quality of life. The Onco-nutritionists would help you make informed choices about nutrition on evidence-based assessment, answer your nutrition-related questions, and help you achieve and maintain good health.

- **MIND-BODY THERAPY**

The mind-body therapy at Cytecure is designed to support you and your caregivers before, during and after cancer treatment. Mind-body therapy, an integral part of holistic care, recognises the powerful ways in which emotional, social and behavioral factors may directly affect a patient's physical health. We offer therapeutic practices and relaxation techniques in an effort to help you and your caregivers respond to a cancer treatment regimen in empowering and stress-reducing ways, so that you are better able to improve your health, relationships, and overall well-being.

- **PATIENT NAVIGATORS**

Cytecure's dedicated patient navigators provide patients, their families and caregivers with highly personal services and a strong support network across their journey to recovery and aftermath. Patient navigators support cancer patients to take the timely decision that aids better outcomes, providing education and helping in breaking health system barriers. With their own personal experiences to share, they form the bridge between the treatment world and the patient.

Fighting cancer the right way

PRESENTING COMPREHENSIVE ONCOLOGY

To fill in the gaps in cancer care.

CYTECARE LEAVES NO STONE UNTURNUED FOR ENHANCING PATIENT WELL-BEING.

Cytecare hospital provides highly specialised treatments and modern diagnostic services for cancer. We are practitioners of researched cancer care methodologies and evidence-based therapies. This level of integrated care is delivered by our multi-disciplinary team of clinicians, who are strongly guided by national as well as global protocols. We also understand that every cancer is different, and so are the patients affected by it. Hence, we provide customised treatments, effective to the particular individual.

WHAT WE STAND FOR

We believe in enriching the treatment with measures that strengthen the physical and psychological healing systems. Integrating these with adjuvant therapeutic methods convert cancer-treatment to cancer-healing, which is our end objective. Cytecare's Comprehensive Oncology, involves a therapeutic strategy that brings together disciplines which work to achieve an orchestrated symphony of healing; complementing faster recovery and longevity of life.

THE TREATMENT & CARE WE PROVIDE

Cytecare's Comprehensive Oncology invests to constantly evolve with time its services that can enhance our current services. We put great effort to maintain and promote the quality of care we provide equally to all our patients. We also partner with other healthcare channels to provide you continuum of care inside the comforts of your home during your recovery and recuperation.

The various life-streams that are a part of this offering are:

- **PAIN AND PALLIATION**

The Pain and Palliative medicine specialist is an integral part of our multi-disciplinary team. The journey from diagnosis through treatment can be challenging and daunting for you and your loved ones. Our palliative specialist works along with the treating physician throughout your care - to support, prevent and ease the suffering from the effects of cancer and its treatment. The multi-disciplinary team strives to improve your quality of life, thus helping you tolerate and comply to treatment positively and have quality time with your family. This would directly improve the acceptance of treatment and hence improve the longevity of life.

- **PSYCHO-ONCOLOGY**

Feeling distressed when you or your loved one is diagnosed with cancer is often a part of the cancer journey. At times these feelings of distress continue to linger or increase and often interfere with treatment and overall quality of life. Thus, the discipline of Psycho-oncology focuses on understanding the psycho-social and psycho-biological aspects of cancer to reduce psychological distress and improve quality of life, leading to a better functional and emotional well-being. The Psycho-oncology Services (POS) at Cytecare offers professional psychological support in the form of psychological counselling, psychotherapy and psycho-education to patients and their loved ones on the emotional challenges that may arise at all stages of the cancer journey.
