TEST	PERIPHERAL SMEAR
COLLECT	EDTA sample/ peripheral smear (min. 2 no.)
TAT	3 Hours
PRICE	₹ 210

# Diagnostic Services, Specialised Testing & Second Opinion Consultations

The Department of Pathology at Cytecare provides diagnostic services, specialised testing and second opinion consultations for patients with cancer. Our team consists of surgical pathologists and surgical oncopathologists with extensive expertise in a range of onco as well as non onco histopathology. In addition, our pathologists collaborate with other specialists at tumor board to customise each patient’s treatment based on his or her individual diagnosis. Cytecare uses state of art technology and the most advanced diagnostic techniques consisting of a wide panel of Immunohistochemical markers to improve the diagnostic accuracy that can further classify cancers. Precise histologic and cytologic classification and testing for clinically useful mutations in patients’ tumour allow us to match individual patients with the targeted therapies that are likely to benefit them.

Led by a team of professional onco-pathologists renowned for diagnostic excellence we are committed to excellence in providing diagnostics services for tissue diagnoses of cancer.

IMMUNOHISTOCHEMISTRY

Immunohistochemistry (IHC) helps to identify specific tumour markers such as oncogenes, tumour-specific antigens, tumour suppressor genes and tumour proliferation markers. Identification of these markers specific to a particular cell of origin helps to diagnose and sub classify a cancer.

SECOND OPINION CONSULTATION

Cytecure pathology department provides second opinion consultations/services on pathology tissue samples sent to us from pathologists or clinicians outside to help you confirm/exclude the diagnosis. In case of difficult or ambiguous diagnosis, our expertise in assessing difficult or unusual cases can help provide an accurate diagnosis. If any questions remain after our initial review, the case will be reviewed by a team of Cytecure experts before a final diagnosis is made. Our pathology team can also help determine if the tumour is localised or has metastasized from another region of the body.

HAEMATOLOGY SERVICES

CODE	0100LABHEM003
TEST	BONE MARROW ASPIRATION
COLLECT	BMA smears/EDTA sample
TAT	24 Hours
PRICE	₹ 1,680

CODE	0100MOTPOR007
TEST	BONE MARROW BIOPSY
COLLECT	10% formalin paraffin block
TAT	3 days
PRICE	₹ 1,680
